Experience

- 2024–2025 **Web Full-stack**, *Anthology*, Brno.
Developing new features for education accessibility platform & Ally
- 2022–2024 **Product developer**, *Freelance*.
Directly assisting clients with tailored full-stack solutions "from analysis to analytics"
- 2019–2022 **Data Engineer**, *Kiwi.com*, Brno.
Building and maintaining data pipelines, contributing to the formation of a data warehouse, and assisting with analysis and visualization, while ensuring data quality
- 2017–2019 **Web Frontend**, *InQool a.s.*, Brno.
Creating custom web applications for e-shops. Notably, I've worked on & Brno iD

Education

- 2018–2020 **Artificial Intelligence and Data Processing***, *Master's degree*, Faculty of Informatics, Masaryk University.
*Not formally finalized
- 2015–2018 **Computer Systems and Data Processing**, *Bachelor's degree*, Faculty of Informatics, Masaryk University.
- 2010–2015 *Technické lyceum*, Středná priemyselná škola, Bardejov

Masters thesis

- Title *Tool Supporting Analysis of Meteorology Data*
- Supervisor RNDr. Tomáš Rebok, Ph.D.
A newly built system allowing users to process and validate meteorological data while enhancing the analytical capabilities.
- Url & Full text

Bachelors thesis

- Title *Techniques for measuring similarity of educational items*
- Supervisor doc. Mgr. Radek Pelánek, Ph.D.
Using machine learning to measure the similarity of questions in tutoring systems utilizing only the correctness of answers from users.
- Url & Full text, excerpt: & ienze.me/tmsei_thesis

About

Even outside of work, I like to fill my time with a variety of projects, hobbies, and things to learn. I enjoy urbexing and working in nature, hanging out in unusual places, spending my time outside and around other people. Every couple weeks I play boardgames with my friends and hang out.

50+ small personal projects

Skills

User-facing

- JavaScript, TypeScript,
- React, WebGL, Unity,
- Data annotation,
- CI/CD pipelines.

Business logic

- Python, PyTorch,
- PostgreSQL, C++,
- LLM APIs, RAG, MCP,
- Machine learning, Testing.

Operations

- Linux, Kubernetes,
- GCP, AWS, Docker,
- Evaluation, Grafana,
- RunPod, Ollama.

Languages English (*Fluent*), Slovak (*Native*), Czech

Last notable project

2025-2026 **Styloma**, *Fashion search engine and clothing discovery.*

A clothing aggregator providing lookup by reverse image search as well as deeper interpretation of textual descriptions. Consisting of

- Retailer data ingestion,
- Image and semantic embedding,
- Data pipelines,
- Scheduling of scraping,
- Consolidation of competing offers,
- AI model training.

- AI
- Image, item and user embeddings combined into one weighted hybrid search,
 - Item embeddings from image and text understanding, not keyword or pixel matching,
 - Vector retrieval over 200,000+ products, 1,000,000+ images,
 - Custom-trained item detection model, evaluated against public fashion datasets,
 - Human-in-the-loop agentic development sub-system.
