Experience

- 2024–2025 **Web Full-stack**, *Anthology*, Brno.
Developing new features for education accessibility platform 🌐 Ally
- 2022–2024 **Product developer**, *Freelance*.
Directly assisting clients with tailored full-stack solutions "from analysis to analytics"
- 2019–2022 **Data Engineer**, *Kiwi.com*, Brno.
Building and maintaining data pipelines, contributing to the formation of a data warehouse, and assisting with analysis and visualization, while ensuring data quality
- 2017–2019 **Web Frontend**, *InQool a.s.*, Brno.
Creating custom web applications for e-shops. Notably, I've worked on 🌐 Brno iD
- 2016–2018 **Research**, *Adaptive Learning group, Faculty of Informatics, Masaryk University*, Brno.
Research lab using artificial intelligence to make learning more efficient and engaging; co-author of 🌐 Measuring item similarity in introductory programming, ACM Learning at Scale 2018

Education

- 2018–2020 **Artificial Intelligence and Data Processing***, *Master's degree*, Faculty of Informatics, Masaryk University.
*Not formally finalized
- 2015–2018 **Computer Systems and Data Processing**, *Bachelor's degree*, Faculty of Informatics, Masaryk University.
- 2010–2015 *Technické lýceum*, Středná priemyselná škola, Bardejov

Bachelors thesis

- Title *Techniques for measuring similarity of educational items*
- Supervisor doc. Mgr. Radek Pelánek, Ph.D.
Using machine learning to measure the similarity of questions in tutoring systems utilizing only the correctness of answers from users.
- Url 🌐 Full text, excerpt: 🌐 ienze.me/tmsei_thesis

About

Even outside of work, I like to fill my time with a variety of projects, hobbies, and things to learn. I enjoy urbexing and working in nature, hanging out in unusual places, spending my time outside and around other people. Every couple weeks I play boardgames with my friends and hang out.

50+ small personal projects

Skills

Games

- Unity, C#, WebGL,
- Game design, NPC AI,
- Level design, 2D assets,
- Blender, Processing.

Data

- Python, SQL, BigQuery,
- Statistics, Simulation,
- AI, Machine learning,
- Airflow, Jupyter.

Live product

- User analytics, Grafana,
- Data quality, Alerting,
- GCP, AWS, Docker,
- Linux, Kubernetes.

Languages English (*Fluent*), Slovak (*Native*), Czech

Game design

Game design and NPC AI development, *Non-public project.*

2022–2023 **Card collecting game**, *Unity, blockchain based*, Freelance.

Integration of distributed systems, WebGL port, websocket networking and backend; replaced card asset loading with a more efficient method

InterLoS, *Online logic team competition*, Faculty of Informatics, Masaryk University.

Organizing: ciphers, programming and logic tasks with live scoring for 1–5 member teams in three categories

Game jams, published 2D game assets and Minecraft server plugins with an in-game economy: deegmiterko.com

Progression from data

2024 **Na medicínu**, *Internal system for a study course*, namedicinu.cz.

An application where students practice and watch lectures, while giving lecturers quantitative data about what topics need to be covered better.

- Flashcard training,
- Generating quizzes for testing,
- User analytics,
- Lecturer insights about students.
