Experience

- 2024–2025 **Web Full-stack**, *Anthology*, Brno.
Developing new features for education accessibility platform 🌐 Ally
- 2022–2024 **Product developer**, *Freelance*.
Directly assisting clients with tailored full-stack solutions "from analysis to analytics"
- 2019–2022 **Data Engineer**, *Kiwi.com*, Brno.
Building and maintaining data pipelines, contributing to the formation of a data warehouse, and assisting with analysis and visualization, while ensuring data quality
- 2017–2019 **Web Frontend**, *InQool a.s.*, Brno.
Creating custom web applications for e-shops. Notably, I've worked on 🌐 Brno iD

Education

- 2018–2020 **Artificial Intelligence and Data Processing***, *Master's degree*, Faculty of Informatics, Masaryk University.
*Not formally finalized
- 2015–2018 **Computer Systems and Data Processing**, *Bachelor's degree*, Faculty of Informatics, Masaryk University.
- 2010–2015 *Technické lyceum*, Středná priemyselná škola, Bardejov

Masters thesis

Title *Tool Supporting Analysis of Meteorology Data*

Supervisor RNDr. Tomáš Rebok, Ph.D.
A newly built system allowing users to process and validate meteorological data while enhancing the analytical capabilities.

Url 🌐 Full text

Bachelors thesis

Title *Techniques for measuring similarity of educational items*

Supervisor doc. Mgr. Radek Pelánek, Ph.D.
Using machine learning to measure the similarity of questions in tutoring systems utilizing only the correctness of answers from users.

About

Even outside of work, I like to fill my time with a variety of projects, hobbies, and things to learn. I enjoy urbexing and working in nature, hanging out in unusual places, spending my time outside and around other people. Every couple weeks I play boardgames with my friends and hang out.

50+ small personal projects

Skills

User-facing

- Unity, Godot, WebGL,
- Web (React, JavaScript,
- CSS and transpilers),
- OpenGL, Shaders,

Business logic

- C++, C#, Python,
- Image/video processing,
- Java,
- AI, Machine learning.

Operations

- PR reviews, Git,
- CI/CD pipelines,
- GCP, AWS, Docker,
- Testing, TDD.

Languages English (*Fluent*), Slovak (*Native*), Czech

Computer graphics

FI MUNI During study I absolved many computer graphics courses including: [PB009](#) Computer Graphics Principles, [PV112](#) Computer Graphics API, [PV227](#) GPU Rendering, [PV197](#) GPU Programming (OpenCL, CUDA),

Last notable project

2025-2026 **Styloma**, *Fashion search engine and clothing discovery.*

A clothing aggregator providing lookup by reverse image search as well as deeper interpretation of textual descriptions. Consisting of

- Retailer data ingestion,
- Image and semantic embedding,
- Data pipelines,
- Scheduling of scraping,
- Consolidation of competing offers,
- AI model training.
