Experience

- 2024–2025 **Web Full-stack**, *Anthology*, Brno.
Developing new features for education accessibility platform [Ally](#)
- 2022–2024 **Product developer**, *Freelance*.
Directly assisting clients with tailored full-stack solutions "from analysis to analytics"
- 2019–2022 **Data Engineer**, *Kiwi.com*, Brno.
Building and maintaining data pipelines, contributing to the formation of a data warehouse, and assisting with analysis and visualization, while ensuring data quality
- 2017–2019 **Web Frontend**, *InQool a.s.*, Brno.
Creating custom web applications for e-shops. Notably, I've worked on [Brno iD](#)
- 2015–2016 **Web Backend**, *WAME.sk*, Bardejov.
Developer of custom e-commerce solutions (Nette) in a small team

Education

- 2015–2018 **Computer Systems and Data Processing**, *Bachelor's degree*, Faculty of Informatics, Masaryk University.
- 2010–2015 *Technické lýceum*, Stredná priemyselná škola, Bardejov

Masters thesis

- Title *Tool Supporting Analysis of Meteorology Data*
- Supervisor RNDr. Tomáš Rebok, Ph.D.
A newly built system allowing users to process and validate meteorological data while enhancing the analytical capabilities.
- Url [Full text](#)

Bachelors thesis

- Title *Techniques for measuring similarity of educational items*
- Supervisor doc. Mgr. Radek Pelánek, Ph.D.
Using machine learning to measure the similarity of questions in tutoring systems utilizing only the correctness of answers from users.
- Url [Full text](#), excerpt: [ienze.me/tmsei_thesis](#)

About

Even outside of work, I like to fill my time with a variety of projects, hobbies, and things to learn. I enjoy urbexing and working in nature, hanging out in unusual places, spending my time outside and around other people. Every couple weeks I play boardgames with my friends and hang out.

50+ small personal projects

Skills

User-facing

- JavaScript, TypeScript,
- React, Angular, MUI,
- CSS and preprocessors,
- CI/CD pipelines.

Business logic

- Python, Java, OpenAPI,
- PostgreSQL, MongoDB,
- AI, Machine learning,
- C++, Testing, Kafka.

Operations

- Linux, Kubernetes,
- Grafana, Terraform,
- GCP, AWS, Docker,
- GitLab, GitHub workflows.

Languages English (*Fluent*), Slovak (*Native*), Czech

Last notable project

2025-2026 **Styloma**, *Fashion search engine and clothing discovery.*

A clothing aggregator providing lookup by reverse image search as well as deeper interpretation of textual descriptions. Consisting of

- Retailer data ingestion,
- Image and semantic embedding,
- Data pipelines,
- Scheduling of scraping,
- Consolidation of competing offers,
- AI model training.

Architecture Being built as a monorepo of TypeScript packages for back-end (micro)services, front-end applications (React PWA, Material UI), and tooling, allowed me to easily ensure type coherence across the whole project from database ORM up to display components themselves.
