About

Even outside of work, I like to fill my time with a variety of projects, hobbies, and things to learn. I enjoy urbexing and working in nature, hanging out in unusual places, spending my time outside and around other people. Every couple weeks I play boardgames with my friends and hang out.

50+ small personal projects

Skills

Games

- Unity, C#, WebGL,
- Game design, NPC AI,
- Level design, Modding,
- Blender, Processing.

Data

- Python, SQL, BigQuery,
- Statistics, Simulation,
- AI, Machine learning,
- Airflow, Jupyter.

Live product

- User analytics, Grafana,
- Data quality, Alerting,
- GCP, AWS, Docker,
- Claude Code, MCP.

Languages English (*Fluent*), Slovak (*Native*), Czech

Game design

Game design and NPC AI development, *Non-public project.*

2022–2023 **Card collecting game**, *Unity, blockchain based*, Freelance.

Integration of distributed systems, WebGL port, websocket networking and backend; replaced card asset loading with a more efficient method
