## Masters thesis

- Title *Tool Supporting Analysis of Meteorology Data*
- Supervisor RNDr. Tomáš Rebok, Ph.D.  
A newly built system allowing users to process and validate meteorological data while enhancing the analytical capabilities.
- Url [Full text](#)

## Bachelors thesis

- Title *Techniques for measuring similarity of educational items*
- Supervisor doc. Mgr. Radek Pelánek, Ph.D.  
Using machine learning to measure the similarity of questions in tutoring systems utilizing only the correctness of answers from users.
- Url [Full text](#), excerpt: [ienze.me/tmsei\\_thesis](#)

## About

Even outside of work, I like to fill my time with a variety of projects, hobbies, and things to learn. I enjoy urbexing and working in nature, hanging out in unusual places, spending my time outside and around other people. Every couple weeks I play boardgames with my friends and hang out.

50+ small personal projects

## Skills

### User-facing

- JavaScript, TypeScript,
- React, Angular, MUI,
- CSS and preprocessors,
- CI/CD pipelines, git.

### Business logic

- PHP, Python, Java,
- PostgreSQL, PrestaShop,
- AI, Machine learning,
- C++, C#, TDD, Testing.

### Operations

- Linux, Kubernetes,
- Grafana, Terraform,
- GCP, AWS, Docker,
- GitLab, GitHub workflows.

*Languages* English (*Fluent*), Slovak (*Native*), Czech

## Last notable project

2025-2026 **Styloma**, *Fashion search engine and clothing discovery.*

A clothing aggregator providing lookup by reverse image search as well as deeper interpretation of textual descriptions. Consisting of

- Retailer data ingestion,
- Image and semantic embedding,
- Data pipelines,
- Scheduling of scraping,
- Consolidation of competing offers,
- AI model training.
